

# ToolCover Uptime

**Guard your tools – maximize your productivity**

Atlas Copco's ToolCover Uptime solution gives you maximized productivity – with minimized total cost of ownership:

Smart Preventive Maintenance tailored to real-time changes in your production

Professional outsourcing of your tool maintenance, calibration and repairs

Minimized online failures

Instant tool failure support

Optimized line quality and reduced data loss

Fastest possible turnaround time

# ToolCover Uptime

**Focus on your production by taking away time spent on your tools**

Managing your tools without the right systems and competence often reduces productivity and increases cost:

Recurring line stoppages and tool breakages – with production, quality and data loss

Unnecessary long downtimes

Inefficient and costly tool management

Unnecessary high spare parts and tools inventory

Efficiency losses in line and tool management

# Deliverables

- On-site personal tool management – taking care of all your tools.
- Optimized Preventive Maintenance and Calibration cycles – tailored to your real-time production needs
- Repairs and spare parts included
- On-site real-time tool support
- Full KPI transparency tracking program effectiveness
- Cost savings proposal reports
- Fixed budget offering with total cost control
